SUMMARY

DevOps Engineer with **3+ years of hands-on experience** designing, building, and maintaining Docker-based container environments for large-scale, production workloads. Specialized in **Docker image hardening, digest-based deployments, container lifecycle management**, and building reliable CI/CD pipelines (Jenkins, GitLab CI, GitHub Actions). Experienced containerizing diverse application stacks — including Java, .NET, and Python — and supporting scalable, automated deployment workflows. Available for remote contract work **10-40 hrs/week**.

50% Faster deployments	75% Release frequency ↑	40% Cost reduction	300+ Projects supported
----------------------------------	-----------------------------------	------------------------------	-----------------------------------

EXPERIENCE

DevOps Engineer (Docker & CI/CD) · Sacombank Jul 2024 – Present · Ho Chi Minh City
Core Banking · Open Banking · Payment Systems — 300+ production projects

- **Designed and maintained Docker-based environments** for multi-environment deployments (dev, SIT, UAT, staging, production), enforcing image immutability and **digest-based deployments** for reliable traceability and rollback.
- Built and optimized **CI/CD pipelines** using Jenkins (Pipeline as Code / Groovy) and GitLab CI — reducing deployment lead time by **50%** and increasing release frequency by **75%**.
- Containerized Java (Maven), .NET, and **Python application stacks**; standardized Dockerfile authoring practices and image-tagging strategies across 300+ production projects.
- Migrated on-premises workloads to **OpenShift OCP (Kubernetes)** with rolling zero-downtime deployments — managing container lifecycle from build through production using Helm and custom manifests.
- Integrated container security scanning (**Aqua Scanner, SonarQube, BlackDuck**) into CI pipelines, ensuring every image passed compliance gates before promotion to production.
- Maintained monitoring of containerized systems (Grafana, Prometheus, Datadog, Zabbix) to sustain **99% uptime SLA** and proactively detect container-level performance issues.
- Documented Docker/CI/CD processes; authored **Ansible playbooks** for container host configuration management; conducted team knowledge-sharing sessions on best practices.

DevOps Engineer (Containerization & Pipelines) Sep 2022 – Jul 2024 · Ho Chi Minh City
• **DXC Technology Vietnam**

Enterprise Clients: Allianz Philippines · AIA · PSMBFI

- Containerized microservices and legacy applications using **Docker**; standardized image builds and deployment pipelines for multiple enterprise clients in regulated environments.
- Implemented end-to-end **CI/CD pipelines** (Jenkins, GitLab CI) with automated testing, security scanning, and multi-environment deployment gates.
- Used **Terraform and Ansible** to provision and configure container host infrastructure, ensuring environment parity across dev, staging, and production.

- Built artifact management workflows with **Nexus and JFrog Artifactory**; delivered critical platform deployment within **100 days**, earning formal recognition from Allianz Philippines.
- Collaborated with dev teams to containerize applications and reduce environment-specific issues through consistent Docker-based build environments.

TECHNICAL SKILLS

Docker	Image hardening, Dockerfile authoring, digest-based deployments, multi-stage builds, container lifecycle management
CI/CD	Jenkins (Groovy Pipeline as Code), GitLab CI, GitHub Actions; quality gates, rollback strategies, artifact governance
Orchestration	Kubernetes, OpenShift OCP, Helm; rolling deployments, Ingress, TLS automation (Traefik, Let's Encrypt)
IaC & Automation	Ansible, Terraform, Bash, Python; environment provisioning, config management, deployment scripting
Container Security	Aqua Scanner, SonarQube, Coverity, BlackDuck; compliance-gated pipelines, least-privilege access
Monitoring	Grafana, Prometheus, Datadog, Zabbix; container-level metrics and alerting
Cloud (AWS)	EC2, S3, ECS, RDS, Lambda, API Gateway
Artifact Management	Nexus, JFrog Artifactory
Languages	Bash, Python, Groovy

EDUCATION

B.Sc. Information Technology

University of Information Technology (UIT) — Ho Chi Minh City

2022
